To Whom it may concern;

This letter is a recommendation for IOS Consulting Group Inc. I have entrusted my accounting software needs to Mr. Kerry Gullins from IOS and he has supported and met my software needs unfailingly.

As someone who is not very current in software knowledge it was with great appreciation that we found Mr. Gullins. We appreciate his extensive knowledge of our previous software and understanding of what our requirements were to bring us into the 21st century (so to speak).

Previously we had been running our accounting reports on a very old dos based version of Accpac Plus. It was with some trepidation that I started looking to upgrade our program, as I found there was very little in the marketplace that had the same features we relied on with our Accpac software. After some research we discovered IOS Consulting and Mr. Gullins (Kerry). After discussing our needs and explaining some unique statement and GL requirements with him, he was able to reassure us that Adagio GL and Adagio FX Pro would more than sufficiently meet our needs. As a matter of fact the tools offered by Adagio would allow us to get even more from our financial statements.

We have been using IOS Consulting now for over a year and I can attest to the fact that Mr. Gullins and his team at IOS Consulting have made the upgrade and change of our accounting software as seamless and painless as possible. As we have eight separate GL's it could have been an arduous process I'm sure without Kerry Gullins knowledge and computer skills. I wouldn't have believed how quickly and simply the switch was had I not gone thru the process myself!

Mr. Gullins is quick to respond regarding any questions or assistance that we may have and is always professional and courteous, with the type of support you can rely on. It is with no hesitation that I recommend IOS Consulting Group and Adagio software to anyone considering making a switch.

Sincerely;

Janice Pike
